Brava

Simplified device Management for a secure, Modern workforce

Brava Managed Detection and Response (MDR) is a cutting-edge cybersecurity solution designed to protect your business from advanced cyberthreats. Combining AI-powered threat detection with 24x7 monitoring and human expertise, Brava MDR ensures that your IT environment is continuously safeguarded against attacks like ransomware, insider threats, and zero-day vulnerabilities. Our solution offers businesses a seamless and scalable way to fortify their security posture, preventing breaches before they occur and minimising damage if they do.

Unmatched security, every step of the way

Rapid threat detection and response

Brava MDR actively monitors your network around the clock, identifying suspicious activity before it becomes a serious threat. Our AI-driven technology and expert team work together to detect emerging risks, so your business can respond swiftly and effectively to minimise damage.

Continuous compliance and reporting

Stay ahead of regulatory requirements with continuous compliance reporting. Brava MDR automatically tracks and reports on your security status, helping you adhere to industry standards and avoiding penalties for non-compliance.

Effortless integration, maximum efficiency

No need to replace your existing security tools. Brava MDR integrates effortlessly with your current infrastructure, enhancing your cybersecurity without disrupting your operations. Our solution adapts to businesses of all sizes, offering scalable protection as your needs grow.

Extensive security features

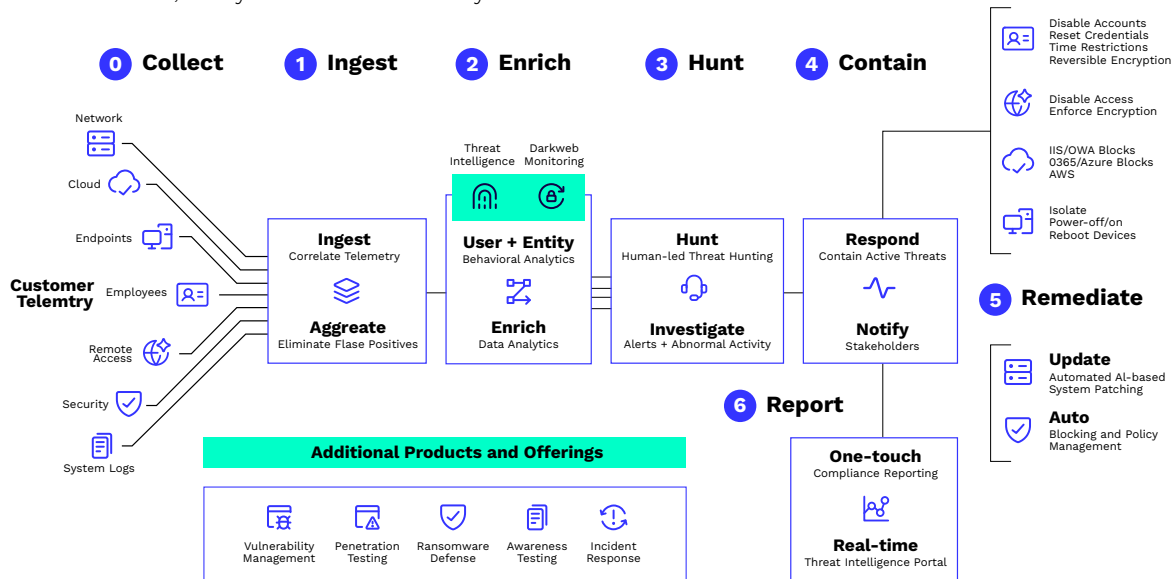

- AI-powered threat detection and machine learning analytics
- 24x7 monitoring and incident response by cybersecurity experts
- Ransomware and exfiltration prevention
- Automated remediation and isolation of compromised systems
- Continuous compliance reporting
- Darknet exposure monitoring to prevent data exploitation

End-to-end security infrastructure

Brava MDR includes a range of advanced tools and technologies that safeguard your network, endpoints, cloud environments, and user behaviors. This multi-layered approach ensures total visibility across your IT landscape, giving you peace of mind knowing that every potential vulnerability is covered. With expert insights, advanced threat hunting, and automated threat resolution, Brava MDR keeps your business one step ahead of cybercriminals.

How it works

Brava MDR continuously monitors your IT environment, using AI and machine learning to detect suspicious activity in real time. When a potential threat is identified, our expert team investigates and takes action to neutralise it before any damage can be done. With effortless integration into your existing security framework, our solution ensures that threats are contained, compliance is maintained, and your business is always secure.

Advanced features

File encryption prevention to safeguard critical data

Brava MDR quickly identifies and blocks malicious attempts to encrypt critical files, ensuring that your important data remains secure and untouched, even in the event of an attack.

High-accuracy threat detection with minimal false positives

Our sophisticated AI and machine learning algorithms enable highly accurate threat detection with minimal false positives, reducing unnecessary alerts and allowing your team to focus on genuine risks.

Real-time insights and detailed reporting

Brava MDR provides real-time insights into your security posture, along with comprehensive, easy-to-understand reports to keep you informed about potential threats, ongoing investigations, and overall cybersecurity performance.

Streamlined system performance with no disruption to operations

Designed to operate efficiently in the background, Brava MDR ensures that there is no negative impact on your system's performance, enabling you to maintain optimal productivity with top-tier security.

Why Us

Brava MDR offers an unbeatable combination of advanced technology and expert human insights to protect your business from evolving threats. Our solution ensures proactive detection, rapid incident response, and ongoing compliance, all while integrating into your existing infrastructure with ease. Trusted by thousands of businesses, our commitment to cybersecurity is unmatched.
