Stay Ahead
of Cyberthreats

With Brava Incident Response Retainer

Brava

Your Cybersecurity Safety Net

The Brava Incident Response Retainer provides your organisation with instant access to expert incident response services, ensuring rapid action when every second counts. With pre-negotiated terms, proactive assessments, and 24/7 priority access to a dedicated response team, your business is always prepared to tackle cyber incidents head-on. This service minimises downtime, mitigates damage, and ensures compliance with industry standards like NIST SP 800-61 and ISO/IEC 27035, offering peace of mind in an unpredictable digital landscape.

Proactive Protection, Rapid Response

Peace of Mind

Focus on your core business while our experts handle your cybersecurity emergencies. The retainer guarantees that help is only moments away, reducing stress and allowing your team to remain productive even in the face of an incident.

Predictable Costs

Avoid unexpected expenses with pre-negotiated pricing. The retainer eliminates emergency service fees, enabling you to budget with confidence while receiving premium incident response support.

Compliance Confidence

Demonstrate your organisation's preparedness to auditors and regulators. Our Incident Response Retainer is designed to align with leading industry standards, keeping your business compliant and resilient against evolving cyberthreats.

Key Features to Keep You Protected

- **Priority Access:** Guaranteed 24/7 availability of expert responders.
- **Flexible Retainer Hours:** Use unused hours for proactive services like security training or penetration testing.
- **Customisable Activation Protocols:** Tailor activation processes to fit your business needs.
- **Proactive Assessments:** Identify vulnerabilities before incidents occur.

Built for Cybersecurity Resilience

The Brava Incident Response Retainer offers a comprehensive approach to incident preparedness and response. By combining rapid activation procedures, clear communication protocols, and ongoing expert support, this service empowers your organisation to manage cyber incidents effectively and recover swiftly.

How It Works

Our process begins with a consultation to define your security needs and establish terms. Our team conducts onboarding, assesses your security posture, and creates custom communication and activation protocols. During an incident, your business can activate the response team immediately to minimise damage and restore operations. Unused hours can be applied to proactive services, maximising the value of your investment.

Advanced Features for Maximising Value

- **Incident Response Plan Audit:** Ensure your incident response plan is comprehensive, up-to-date, and tailored to your specific business needs. Our experts will review your existing strategy, identify gaps, and provide actionable recommendations to strengthen your cyberthreat preparedness.

- **Vulnerability and Penetration Testing:** Identify weaknesses in your systems before attackers can exploit them. Our thorough assessments simulate real-world attack scenarios to spot vulnerabilities and provide detailed remediation strategies to fortify your defences.

- **Architecture Security Review:** Gain a deep understanding of your IT infrastructure's security posture. Our specialists analyse your network, applications, and systems to identify potential weaknesses and recommend optimisations to enhance resilience against sophisticated attacks.

- **Security Awareness Training:** Empower your team to be your first line of defense. This interactive training prepares employees to recognise and respond to phishing attempts, malware threats, and other common attack vectors, reducing human error vulnerability.

Why us?

Brava delivers unmatched expertise, proactive preparation, and tailored solutions that align with your business's unique needs. With our Incident Response Retainer, you gain access to cybersecurity specialists who prioritise your security, provide predictable costs, and enhance your compliance posture.
